PART 2. Read the passage and CIRCLE the best answers to the questions.

As the world becomes hotter because of global warming, more nations are realizing the seriousness of the problem and the importance of protecting our environment. One of the most effective ways people have chosen to protect the environment is to use cleaner or renewable energy. Energy from the sun or solar power is probably the most common type of renewable energy.

In fact, people have been experimenting with the use of solar power for a long time. Basically, a group of solar panels with specially-made batteries trap and store sunlight. The sunlight trapped in the solar panels will be turned into electricity that can be used in our homes. For example, it can heat a water tank and power lights, TVs, air conditioners and other electric appliances.

1. According to the passage, what kind of renewable energy are people most familiar with?
   A. wind energy    B. nuclear power  C. sun energy   D. water power
2. According to the passage, where does solar power come from?
   A. sunlight    B. water     C. moonlight    D. wind
3. According to the diagram, how does solar energy become a source of power?
   A. It converts itself with the help of the wind.    B. It converts itself on its own.
   C. The solar panels help convert it.    D. It converts itself with the help of water.
4. According to the passage, what can solar energy do?
   A. It can heat a water tank.    B. It can power up lights.
   C. It can power up a TV.    D. All of the above
5. According to the writer, the aspect for nations to realize the importance of protecting the environment is __________.
