When robots are widely used in the home, they will probably be used to do the cleaning, table-laying, scrubbing and washing-up, but it is considered unlikely that they will be used to do the cooking - at least, not in the near future.

In factories, mobile robots are already used to carry out a large number of the distribution and assembly tasks while human beings carry out research and produce plans for new products. Among the numerous jobs on the farm, robots will drive tractors, keeping **their** eyes on the ground in front to guide the tractor along a straight line.

The majority of the robots used at present do not look like human beings at all because their design is chiefly functional.

1. According to the passage, when used at home, robots will probably do all of the following EXCEPT \_\_\_\_\_.

- A. laying the table                      B. washing the dishes                      C. washing the clothes                      D. scrubbing
